

CSE 201: Data Structure

Start Up

Course Teacher: Dr. A. H. M. Kamal

To Session: 2016-17

Year : 2

Semester: 1

Date of class commencement: 22/02/2018

Class termination: 31/05/2018

Evaluation method:

Early evaluation

Mid Term I	10
Mid Term II	10
Mid Term III (A project)	10
Class attendance	10

Early evaluation total

40

Final exam

60

Total

100

CSE 201: Data Structure

Start Up

Course Teacher: Dr. A. H. M. Kamal

To Session: 2016-17

Year : 2

Semester: 1

Date of class commencement: 22/02/2018

Class termination: 31/05/2018

One Mid Term will be boosted up. How?

Let the mark of a Mid Term is ***M***.

Let ***L***= $\log_{10}(M) \times 10$

Let ***Integer_of_L***= $\text{ceiling}(L, 1)$

Boosted_UP= $\max(M, \text{Integer_of_L})$

Course Teacher: Dr. A. H. M. Kamal

To Session: 2016-17

Year : 2

Semester: 1

Date of class commencement: 22/02/2018

Class termination: 31/05/2018

What about the project?

You will be assigned a work to perform one of the following:

- to design a game
- to solve a mathematical problem
- to develop an educational apps
- any thing you can propose relating the theme of the course

Another padding course, CSE 202: Data structure lab

Total class 14

Evaluation during class:

Have to submit one report 10

Attendance 10

Assignment/Project/Quiz 20

Early evaluation 40

Final Evaluation:

Viva 20

Script writing 10

Experiment 30

Final evaluation Total 60

Total 100

Academic Offences

Academic Offences include, but are not limited to:

- **Infringing unreasonably** on the work of other members

E.g., disrupting classes

- **Cheating**
- **Plagiarism**
- **Misrepresentations**
- **Copying from unauthorized documents or from side person(s) during the examination**

Plagiarism

All projects must be done individually:

- You may not copy code directly from any other source

- If you viewed another code (from books or lecture notes), you must include a reference in your project

- You may not share code with any other students by transmitting completed functions to your peers

- This restriction includes—but is not limited to—electronic and hard-copy sharing

- You may discuss projects together and help another student debug his or her code; however, you cannot dictate or give the exact solution

Plagiarism

Collaboration with other students must be limited to

- Discussions

- High-level pseudocode

- Assistance with debugging (only through the offering of advice)

- Sharing test files

All such collaborations **must** be documented in your source code

Plagiarism

When one student copies from another student, both students are responsible

Exceptions are made for outright theft

The penalty for plagiarism on a Project is a mark of 0 on the project in question

Plagiarism

One student cannot accept “full responsibility”

- For example, A, B, and C worked together sharing the ideas of each other (Good)
- They each did their own work, however, they shared code to comment on each others programming (may create problem).
- B gave A's code to D who copied it for his project and submitted it
- A and D received a 0.

CSE 201: Data Structure

Start Up

Covered Topics

- Fundamentals
- Mathematical Background
- Array
- Link List
- Stack
- Queue
- Tree
- Graph
- Basic Algorithms
